

Technical product information

Pipe Lubricant FDA

Universal pipe lubricant

Pipe lubricant FDA, a transparent lubricating and assembling product based on esters. **FDA** is a high end quality product generally used for all kind of pipe assembly.

Pipe lubricant FDA has been developed exclusively with natural based raw materials and offers a wide range of applications up to most difficult requirements.

Due to excellent lubricating and gliding properties **pipe lubricant FDA** supports the assembly of the pipes and avoid, if used correctly, the deforming of the gasket within the sealing area and thereby protects against leaks. We recommend applying **pipe lubricant FDA** in sufficient quantities just shortly before the installation of the pipes in order to prevent the drying-up of the lubrication film.

Pipe lubricant FDA is available in tubes from 8ml to 1000ml as well as in different cans and buckets up to 10 kg. Special packagings like drums are available on customers demand.

Technical data

Consistency: paste
Colour: transparent/amber
Working temperature : - 10° C - + 50° C

We recommend to store pipe lubricant **FDA** in closed packages between + 5° C and + 25° C.
